

Mosal

Liquid Neutral Hygiene Active Concentrate

- Properties:**
- Universal-purpose liquid concentrate with a wide range of application
 - Acts reliable against moulds, yeasts and bacteria
 - Keeps swimming pools and closed water circuits free of algae
 - Approved hygienic additive for water separator in HC textile cleaning machines
 - Free of chlorine and formaldehyde

Application: Due to its excellent material compatibility **Mosal** can be applied in many areas and systems to keep them free of algae. As a disinfecting agent **Mosal** can be used on all water resistant surfaces. The disinfecting solution is applied as a spray solution, manual or in a dipping bath.

Algae

0,1 to 0,3 litre **Mosal** per 1000 litre water

Maintenance of water separator in dry-cleaning machine

After each removal of water from the water separator, approx. 10 ml **Mosal** per approx. 100 ml water should be added into it. Additionally the empty water separator should be wiped once a week with a **Mosal** soaked cloth.

Mosal is NOT applicable in fish ponds to control algae!

Technical Data:

Density 20 °C (68 °C)	approx. 1,0 g/ml
pH-value (1 %)	6,0 - 8,0

Hints:

Use biocides safely. Always read the label and product information before use.
