

AQUAWAVE PROFIT BODY

Liquid finishing agent to give protection and retexturing
In the wet cleaning process.

Application

- Specially developed for wet cleaning application.
- Finishing agent for synthetic and delicate fabrics. Gives optimal restyling combined with a pleasant feeling and grip.
- To be used in soft water.

Properties

- Based on a mixture of polymers, which are sufficiently substantive to give an optimal restyle effect, but which are removed easily in the next wash.
- Puts a film on the fibres, which reduces wrinkling and aids ironing.
- Reduces the build-up of static charges.
- Optimal restyling effect, also at short cycle times.
- Gives protection during the drying process

Instructions for use

Recommended dosage:

3 - 5 ml/kg dry fabrics (water 1 : 4).
Use in the last rinse for 3 – 5 min.
Application temperature: 20° – 40°C.

Physico-chemical properties

Density (20°C): ca. 1.0 g/ml
pH-value (1%): ca 7.0

Composition & Safety

Contains polymers, stabilizers and perfume.

Not dangerous.

Meets European directives on the classification, packaging and labelling of dangerous chemical substances and preparations.

Storage

Use above 5°C. Store above 0°C.

Packaging

Canister 20 kg
